Project Name	streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Customer Problem Statement :

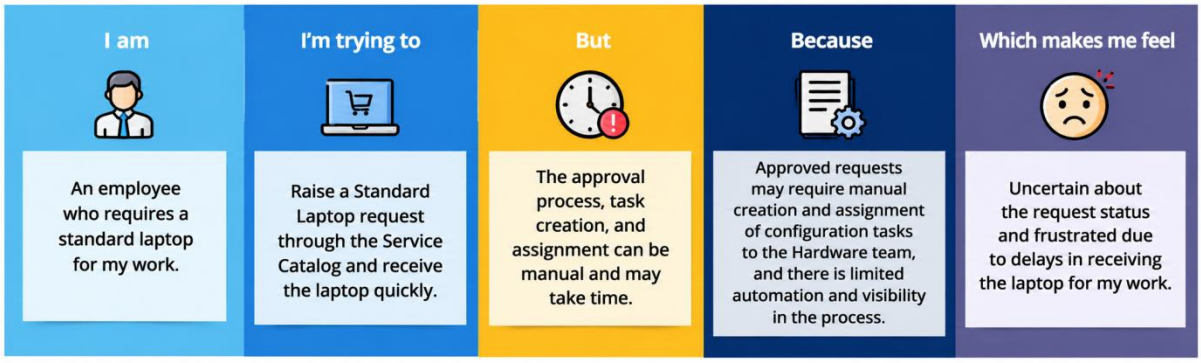

Employees who require a standard laptop need a **simple, fast, and transparent process** to submit their request and track its progress. Currently, manual approval follow-up, Catalog Task creation, and assignment to the Hardware team can increase processing time and require additional effort.

The **Standard Laptop Procurement** project aims to address this problem by using **ServiceNow Flow Designer** to automate the process. Once a Standard Laptop request is approved, the system automatically creates the required Catalog Task, adds the required task details, records the approval, and assigns the task to the **Hardware assignment group**.

This helps reduce manual effort, improve request handling, and ensure that approved laptop requests are consistently routed to the appropriate IT/Hardware team.

I am	Describe customer with 3-4 key characteristics - who are they?	An employee who requires a standard laptop for my work. (e.g., new joinee, existing employee, role that needs a corporate laptop)
I'm trying to	List their outcome or "job" they care about - what are they trying to achieve?	Raise a Standard Laptop request through the Service Catalog and receive the laptop quickly for my work.
but	Describe what problems or barriers stand in the way - what bothers them most?	The approval process, task creation, and assignment to the Hardware team can be manual and may take time, causing delays in receiving the laptop.
because	Enter the "root cause" of why the problem or barrier exists - what needs to be solved?	Approved requests may require manual creation and assignment of configuration tasks to the Hardware team, and there is limited automation and visibility in the process.
which makes me feel	Describe the emotions from the customer's point of view - *how does it* emotionally impact them?	Uncertain about the request status, frustrated due to delays, and dependent on manual follow-up to know when I will receive the laptop.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An employee requesting a standard laptop	Raise a Standard Laptop request through the Service Catalog and receive the laptop quickly	Manual approval follow-up, task creation, and assignment can cause delays	Approved requests may require manual creation and assignment of configuration tasks to the Hardware team	Uncertain about the request status and processing time
PS-2	An IT/Hardware team member responsible for laptop configuration	Process approved Standard Laptop requests efficiently	Laptop configuration tasks may need to be created and assigned	The approved request does not automatically create and assign the required	That additional manual effort is required and processing may become inconsistent

			manually	Catalog Task
