Project Name	streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Empathy Map Canvas – Standard Laptop Procurement

An empathy map is a simple, easy-to-understand visual tool that captures the **behaviour, needs, expectations, and challenges** of users.

For the **Standard Laptop Procurement** project, the empathy map helps the team understand the experiences of **employees requesting a standard laptop** and the **IT/Hardware team processing the requests**.

Understanding their goals and challenges helps identify areas where **Service Now Flow Designer automation** can reduce manual effort, improve request processing, provide better visibility, and ensure that approved laptop requests are correctly assigned to the **Hardware team**.

Example: Standard laptop procurement application
