Project Design Phase
Problem – Solution Fit Template

Date	3 October 2026
Team ID	SWTID-2026-3047
Project Name	streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Problem – Solution Fit :

Problem–Solution Fit means identifying the actual problems faced by employees and the IT/Hardware team during the Standard Laptop procurement process and ensuring that the proposed ServiceNow solution addresses those problems effectively. It helps the team understand customer behaviour, identify process gaps, and develop an automated workflow that reduces manual effort, delays, and unnecessary follow-up.

Purpose:

❑ **Solve procurement problems** in a way that fits the needs of employees and the IT/Hardware team.

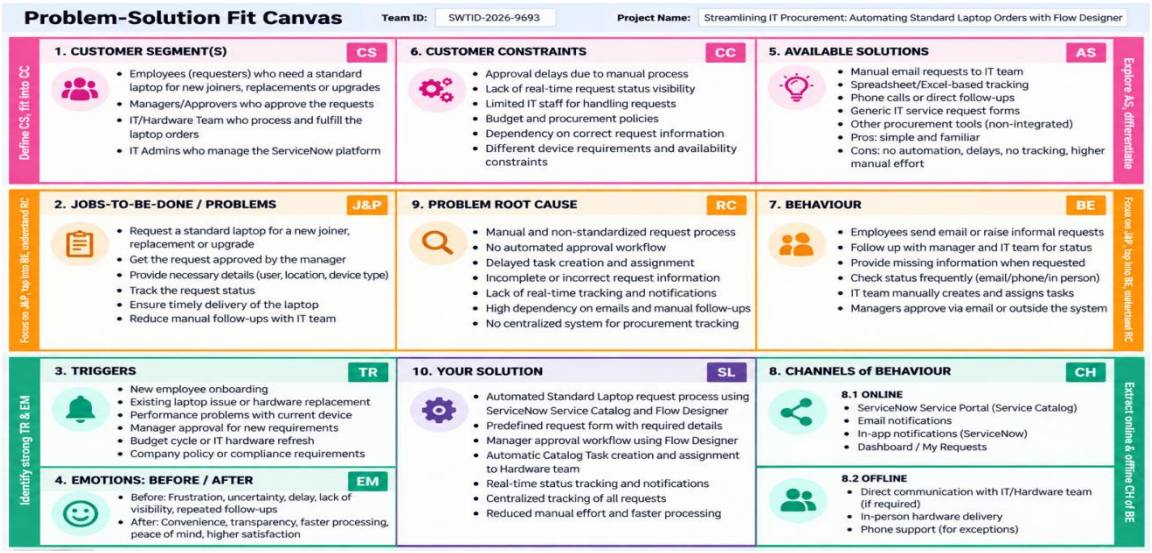

❑ **Improve request processing** by using the existing ServiceNow Service Catalog and Flow Designer workflow.

❑ **Improve communication and transparency** by providing clear approval and request status updates.

❑ **Reduce frequent process issues** such as manual follow-up, delayed task creation, and incorrect task assignment.

❑ **Understand the existing laptop procurement process** and improve it through automated request, approval, task creation, and Hardware assignment.
