Project Overview:

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Project Description: An automated ServiceNow workflow that streamlines Standard Laptop requests by handling approval, automatic Catalog Task creation, task assignment to the Hardware team, and request tracking using Flow Designer.

Project Version: Version 1.0

Testing Period: 01 October 2026 to 3 October 2026

Testing Scope:

· Standard Laptop request submission through **Service Catalog**.
· Request approval and rejection process.
· Flow Designer trigger after request approval.
· Automatic **Catalog Task** creation.
· Automatic population of task description and short description.
· Automatic assignment to the **Hardware assignment group**.
· Request and task status tracking.
· Completion of the laptop configuration task.

user Stories / Requirements to be Tested

- **USN-1:** Submit Standard Laptop request.
- **USN-2:** View request status.
- **USN-3:** Approve or reject the request.
- **USN-4:** Automatically create Catalog Task after approval.
- **USN-5:** Automatically assign task to Hardware group.
- **USN-6:** Hardware team processes and updates the assigned task.

Testing Environment:

URL/Location: https://developer.servicenow.com/dev.do#!/manage-instance

Credentials (if required):

Test Case:

Test case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Submit Standard Laptop request	1. Open Service Catalog. 2. Select Standard Laptop. 3. Submit the request.	Standard Laptop request is created successfully.	Request created successfully. 	Pass
TC-002	Approve laptop request	1. Open the submitted request. 2. Review the request details. 3. Approve the request.	Request approval status changes to **Approved**.	Approval recorded successfully. 	Pass
TC-003	Automatic Catalog Task creation	1. Approve a Standard Laptop request. 2. Wait for Flow Designer execution. 3. Check the Requested Item.	A Catalog Task is automatically created.	Catalog Task created successfully. 	Pass
TC-004	Verify task description	1. Open the created Catalog Task. 2. Check the Short Description. 3. Check the Description field.	Short Description is **"Laptop need to Configured"** and the requirement details are populated.	Details populated correctly. 	Pass
TC-005	Verify Hardware assignment	1. Open the generated Catalog Task. 2. Check the Assignment Group.	Task is automatically assigned to the **Hardware** assignment group.	Task assigned to Hardware successfully.	Pass
TC-006	Reject laptop request	1. Submit a Standard Laptop request. 2. Open the approval request. 3. Reject the request.	Request is marked **Rejected** and the approved-task workflow should not execute.	Rejection recorded successfully.	Pass
TC-007	Track request status	1. Submit a laptop request. 2. Open the request record.	Current request/task status is	Status displayed	Pass

		3. Check its status.	visible to the user or authorized team.	correctly.	
TC-008	Complete Hardware task	1. Open the assigned Catalog Task. 2. Update the task status/details. 3. Complete the task.	Hardware task is updated and completed successfully.	Task completed successfully.	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	No bugs identified during the planned test cases.	Not applicable	Low	Closed	Workflow performed as expected.

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
